PROFESSIONAL SUMMARY

Software developer and AI engineering intern who has delivered 10+ websites, 3+ Android applications, and multi-stage AI automation workflows. Experience across full-stack web, mobile, and workflow automation using React, Next.js, TypeScript, Kotlin, Django, Make, Cloud37, Lovable, Firebase, and SQL.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Kotlin, PHP, Rust, SQL

AI and Automation: Make, Cloud37, Lovable, AI agents, workflow orchestration, process mapping, document generation

Web and Mobile: React, Next.js, React Native, Expo, Django, Laravel, Jetpack Compose, Tailwind CSS

Data and Cloud: PostgreSQL, MySQL, Firebase, Prisma, Supabase, AWS, Vercel, Docker

Tools and Practices: Git, GitHub, GitLab, CI/CD, OAuth 2.0, Microsoft Entra, Agile/Scrum

EXPERIENCE

Tacci Bots | Sunnyvale, CA

Jun 2026 - Sep 2026

AI Engineer Intern

- Design and build multi-step AI automation workflows in Make and Cloud37 using staged agents, conditional routing, information processing, and structured document generation.
- Prototype workflow interfaces and supporting tools in Lovable, connecting user inputs to automated processes.
- Configure AI agents, map structured data between workflow stages, and test and troubleshoot automation logic and generated outputs.

Self-Employed | Manila, Philippines

Jun 2023 - Present

Freelance Full-Stack Developer

- Delivered 10+ responsive websites and landing pages for academic organizations and student projects using React, Next.js, PHP, and Tailwind CSS.
- Built 3+ Android applications with Kotlin, Java, Jetpack Compose, and Firebase for client and academic requirements.
- Managed requirements, development, testing, deployment, documentation, and client handoff while meeting agreed deadlines.

Ethos Bytes | Australia

Oct 2025 - Dec 2025

Software Developer

- Developed and tested features across Django, React, React Native, Next.js, and Python applications using Docker in Agile Scrum sprints.
- Implemented OAuth 2.0 authentication with Microsoft Entra.

SELECTED PROJECTS

StreamPay - APAC Stellar Hackathon, Payment and Consumer Applications Track

Rust, Soroban SDK, Stellar SDK, React, TypeScript

- Built a Stellar testnet salary-streaming platform with escrowed pay periods, per-second wage accrual, worker withdrawals, fair cancellation, Freightier wallet integration, and smart-contract tests.

SafeTransit - Finalist, NMWSO Safety-by-Design Grand Challenge

React Native, Expo, TypeScript, PostgreSQL, Vercel

- Built a community-powered safety navigation app for women commuters with safety-aware route planning, verified alerts, trusted-contact trip sharing, and a discreet SOS feature.

EDUCATION

Technological Institute of the Philippines

Expected May 2027

Bachelor of Science in Information Technology

LEADERSHIP AND AWARDS

- President, Open Source Club: Lead 50+ active members, organize technical workshops and competitive programming activities, and build mentorship and industry partnerships.
- Lead Cloud Security Officer: Apply AWS security practices to student projects and train student developers in secure cloud development.
- Awards: Champion, GRUNDFOS; Third Place, CodeQuest IT Summit.
